

IRWIN® UNIVERSITY

IRWIN® is committed to the pursuit of developing tools to get the job done right. Our commitment extends beyond our broad assortment of innovative IRWIN® products to include the development of our employees and valued customers. We are dedicated to delivering best-in-class career and industry development opportunities through a variety of product training programs.

INSTRUCTOR-LED PRODUCT TRAINING

The IRWIN® University is a state-of-the-art facility dedicated to IRWIN® product development and training. IRWIN® employees participate in a variety of multi-day training programs led by highly skilled facilitators to expand their knowledge of IRWIN® hand tools and power tool accessories. These hands-on courses range from introductory product knowledge overviews to more advanced curriculum including jobsite assessment, phases of construction, and hands-on, real-world product applications.

IRWIN® DESIGN CENTRES

IRWIN® has been delivering high-quality and innovative products for over a century. The experience and knowledge to design and build the IRWIN® products with rigorous testing and quality control are fundamental parts in our ability to offer the best products. Our testing centre facilities across the globe ensure exactly that. The centres opposite use the very latest technology and testing methods within their specific areas of expertise.

NEW PRODUCTS

IRWIN Tools' end-user obsession, combined with world-class product development, enables us to produce professional-grade hand tools and power tool accessories that provide superior performance and durability on the job.

By incorporating end-user feedback with advanced engineering, we deliver innovative products that continue to surpass industry standards.

WISE-GRIP®

The VISE-GRIP® Locking Tool was invented in the 1924 by a blacksmith in a small town of DeWitt, Nebraska. William Petersen was a Danish immigrant who invented the first locking pliers in his blacksmith shop, and began selling them from the back of his car to farmers and people in surrounding towns. He patented his new idea and called it VISE-GRIP®.

Since then, VISE-GRIP® has gained global brand recognition as the first choice for Locking Pliers. Innovation and quality are the core values of the VISE-GRIP® brand. With proven performance in every turn, these are the tools that tradesmen choose first – and pass on to the next generation.

The IRWIN® VISE-GRIP® family offers a full line of locking pliers, water pump & VDE Pliers, certified by TÜV/GS. IRWIN® VISE-GRIP® pliers and wrenches continue to set the standard for dependability, quality, and innovation... today and tomorrow. Wherever there's a need for a quality tool, IRWIN® VISE-GRIP® is on the job.

Record®

Originally established in 1898 in the South Yorkshire city of Sheffield in the UK. The Record Tools Factory was swiftly able to make a long lasting contribution to the worldwide reputation of the region for the manufacture of high quality steel and castings.

The Record® brand name was introduced in 1909 and by the 1920's the product range had expanded into Vices, Planes, Clamps and Pipe Wrenches enabling the business to grow rapidly in the UK and many overseas markets.

Today, IRWIN® Record® continues excelling by sticking to the traditional values set by its founders, producing tools that are highly valued amongst professional users for quality and durability that remains strong today.

Fast Release

LOCKING PLIERS

The NEW IRWIN® Vise-Grip® Fast Release locking tools have a one handed, triggerless release, so they're twice as easy to open as the traditional design. Anti-pinch, non-slip ProTouch™ Grips provide comfort, control, and less hand fatigue.

IRWIN® VISE-GRIP® 10CR FAST RELEASE

1. UNIQUE CURVED JAW

Great for securely gripping and torquing multiple surface shapes, including round pipes, square or hex bolts, and more. Perfect for any application that requires maximum torque.

2. SELF-ENERGISING LOWER JAW

Jaw mechanism provides 3X more gripping power*. Pivot allows jaw to align on workpiece for maximum grip without slipping or stripping.

3. BUILT STRONG TO LAST LONG

2x Longer life* High grade alloy steel is heat treated for maximum toughness and durability.

4. PROTOUCH™ GRIPS

Provides comfort, control and less hand fatigue.

5. HEX KEY ADJUSTING SCREW

Tightens to draw material closer together for tighter grip. Loosens to provide controlled release.

These features allow for many clamping applications in welding, automotive and steel framing.	Fabricating Welding Construction
	23	8R 8"/ 200mm	8"/ 200mm	3-1/8" (78 mm)	LOCKING SHEET METAL TOOL The Locking Sheet Metal tool locks to work with powerful grip. Makes all kinds of bending, forming, crimping jobs easier and faster.	Bending Crimping Forming
	25ZR	9R 8"/ 225mm	9"/ 225mm	2-3/4" (70 mm)	LOCKING WELDING CLAMP The Locking Welding Clamp has deep-throated and U-shaped jaws for visibility and working space. Holds work in proper alignment. Use on sheet metal work on automobiles.	Welding Holding
	27ZR	20R 9"/ 225mm	9"/ 225mm	18" (455 mm)	LOCKING CHAIN CLAMP The Locking Chain Clamp holds and locks around any shape or any size of object and adjusts quickly for ratchet action in either direction. Extension chain is available.	Holding
	29	RR 7"/ 175mm	7"/ 175mm	1/4" (6 mm)	LOCKING PINCH-OFF TOOL The Locking Pinch-Off tool with round jaws pinches and locks on tubing instantly without damaging the tubing. Perfect to use for plumbing work, stops flow from untidy tubes. Very popular in the refrigeration market.	Holding
	251	9AC Locking Panel Clamp	9"/ 225mm	2-3/4" (70 mm)	LOCKING PANEL CLAMP The jaws for the Locking Panel Clamp are designed to move in a straight line motion which allows the handle to be out of the way. Auto-body panels can be clamped in place and the door shut to check for gaps before final welding.	Clamping Welding
	8 4 2	4LW 4"/ 100mm 7LW 7"/ 175mm 10LW 10"/ 250mm	4"/ 100mm 7"/ 175mm 10"/ 250mm	(7 mm - 14 mm) (11 mm - 19 mm) (16 mm - 28 mm)	LOCKING WRENCH The jaws of the Locking Wrench lock on three sides of a bolt and will not slip or mark. The Locking Wrench is adjustable to over 16 wrench sizes and features a built-in wire cutter.	Pulling Tightening
	12L3	12LC 12"/ 300mm	12"/ 300mm	3-1/8" (79 mm)	LARGE JAW LOCKING PLIER The large jaws and clamping ability make this tool ideal for plumbers, mechanics, welders and others who work with large objects. Also, its convenient size makes it easier to use than bulkier tools, such as pipe wrenches.	Holding Clamping

IRWIN®

WISE-GRIP®

GROOVELOCK WATER PUMP PLIERS WITH PROTOUCH™ GRIP

GrooveLock Pliers are designed with twice the number of groove positions of traditional groove joint pliers to deliver optimal hand and jaw positioning - providing a superior grip. The specially engineered, all-purpose jaw grips round, hex, square and flat surfaces for incredible versatility.

GrooveLock
Pliers

IRWIN® VISE-GRIP® GV10 GROOVELOCK

1. ALL-PURPOSE JAW:

Grips onto flat, round, hex & square work pieces to provide tremendous bite.

2. PRESS-N-SLIDE BUTTON:

Adjusts jaws 2X faster than traditional groove joint pliers.

3. MULTI-GROOVE RATCHETING SYSTEM:

Has twice the groove positions than other groove joint pliers, for precise positioning on any type of work surface.

4. ANTI-PINCH NON-SLIP PROTOUCH™ GRIPS:

Provide comfort, control and less hand fatigue.

2X FASTER*
*vs traditional Groove Joint pliers

IRWIN®

Record.

PIPE WRENCHES

IRWIN® Record® offer a full range of plumbing tools designed to get the job done quickly and efficiently. From our solid-forged Stillson Wrenches to the lightweight Quick-Wrench, our range of pipe tools offer superior grip due to the unique 'V-shaped' tooth profile.

1. FORGED HOOK JAW

With 2-1/4" jaw capacity equivalent to standard 14" pipe wrench; ideal for pipe diameters up to 1-1/2"; ideal for most surfaces including black, galvanized, PVC and copper pipe, as well as nuts, bolts and couplings; broached teeth.

2. QUICK ADJUSTING JAW

With one-handed operation, ratchets quickly to work the surface.

3. CAST ALUMINIUM CONSTRUCTION

For 40% less weight than standard 14" cast iron pipe wrench; ergonomic handles are ideal for heavy torque and maximum comfort.

3X FASTER*

HANDIWRENCH

Chain pipe wrenches are mainly used in confined spaces, such as against a wall or close to a nest of other piping. Simply loop the chain around the pipe, lock it and the jaws will grip in the direction of the turn. The pipe can then be easily tightened or loosened with short strokes of the handle.

HACKSAW BLADES

Improved cutting performance with the use of IRWIN® high-quality hacksaw blades. New tooth geometry provides higher resistance against tooth strippage and increases longevity & durability. Leveraging the advantages of the WeldTec™ platform IRWIN® hacksaw blades enable faster, smoother and less tiring cutting.

BI-METAL HACKSAW BLADES

1. WELDTEC TECHNOLOGY

Innovative tooth geometry withstands wear and keeps the blade sharp for a long time.

2. BI-METAL CONSTRUCTION

Prevents blades from shattering and delivers long blade life.

HACKSAW FRAMES

The IRWIN® Hacksaw frames are built to meet the professional's demanding needs. The durable IRWIN® frames make cutting quick and easy.

I - 125 HIGH-TENSION HACKSAW (125KG/25000 PSI)

The IRWIN® heavy-duty hacksaw frame is able to reach over 125kg blade tension to ensure accurate cutting. The soft-touch handle gives professionals a solid and slip-free grip.

Ergonomic Metal Frame for higher blade tension preventing the blade being released when dropped

Metal Tensioning Mechanism for a longer lasting tool

Soft Touch Handles ensure a comfortable sawing grip and prevents slippage

Blade Storage no need to search for spare blades

90°-55° Blade Mounting for sawing large objects

Jab-Saw for sawing in confined spaces

BOLT CUTTERS

IRWIN® Record® bolt cutters made their debut in 1923. IRWIN® Record® bolt cutters combine specially formulated steel jaws and exacting manufacturing techniques to make a range of cutters that will handle high, low and medium tensile materials of all kinds.

HEAVY-DUTY ARM-ADJUSTED DROP FORGED HANDLES – CENTRE CUT

Designed to withstand the most extreme situations, high-tensile drop-forged steel jaws plus two-stage heat and ground jaws significantly increase durability and offer a stable cut capacity. Drop-forged steel handles provide safety and reliability and offer you optimal performance for cutting high-tensile material.

- Each jaw is progressively heat treated to give a penetrating cutting edge and resilient body
- Jaws are drop-forged from a specially formulated steel machined to precise specifications
- Compound action supplies 80lbs of force for every 1lb applied to the handles
- Drop-forged steel handles
- Safety stops prevent trapped fingers

- 2 arm rivets
- 1 jaw center pin

SNIPS AND SHEARS

IRWIN® Gilbow® snips and shears have a cutting capability much greater than the strength of the user. The original tin snips were first designed in 1924 and have dominated the sheet metal cutting industry to such an extent that today, snips and shears are referred to as 'Gilbows'.

Unique non-slip joint set and tested for a perfect cut. This should be re-adjusted only after sharpening
Double, hollow ground blades reduce friction for easier cutting

Drop-forged carbon tool steel handles and blades
Safety stop prevents trapped fingers

AVIATION AND OFFSET SNIPS

IRWIN® Aviation and Offset Snips have precision formed blades for a longer cutting life; ergonomically designed over-moulded soft-grips for a perfect balance of comfort and performance in the hand, and a long-life torsion spring for a smooth and consistent cut.

Serrated lower blade for firmer action, smoother cut, and no double marked edges
ProTouch™ moulded soft-grips for superior comfort and control, resulting in less hand fatigue/stress
Increased length of cut for faster work
Improved balanced weight distribution for greater comfort
Drop-resistant latch for easy one-handed use, saving time & increasing safety
250mm long with a 3.34cm length of cut
Cut capacity of 1.19mm sheet metal and 0.84mm stainless steel

In 1933, a young man by the name of Hans Schroder set up as a wholesaler in Copenhagen, Denmark. During the first few years he kept his focus on selling general hand tools, but in 1938 he started to also manufacture saws. Amongst his friends and business associates Hans Schroder was known simply as Jack, and before long, the "Jack" name had become synonymous with the production of high quality saws.

IRWIN® Jack® has been at the forefront of many advances with the development of the market leading Jack® 880 now with upgraded protouch handle to compliment the recently upgraded Universal triple ground technology.

Marples®

At the heart of quality craftsmanship lies the rich heritage of Marples® woodworking tools. Originating in 1828 in Sheffield, England, the Marples® brand has consistently stood for superior performance and ultimate precision in fine woodworking.

Founder William Marples came from a long lineage of master craftsmen in the joinery and edge tool trades, and after serving as an apprentice to his father he established William Marples and Sons Limited. Using only the finest materials Marples® had his name stamped into every product as a sign of his confidence in the quality and craftsmanship of each tool.

XPERT

- Triple-ground teeth** for ultimate cutting performance
- 1mm rigid blade** for maximum stability
- Deep gullets** for enhanced performance & greater volume removal of waste material (Coarse saw only)
- Fine nose teeth** for easy start (Universal and Toolbox Saw only)
- Soft-grip handle with finger guide** for maximum comfort in prolonged use
- Hard point teeth** for longer life
- High quality C75 steel blade** that is stable and ensures maximum power transfer
- Water based lacquer** gives four times better rust protection than traditional lacquer

The ultimate cutting comfort and performance of the XPERT comes from its breakthrough Triple-Ground Teeth (TGT). This technology has been developed in collaboration with the research centre of the University of Newcastle.

The TGT logo is the mark of quality for the IRWIN® Jack® tooth design.

XPERT HANDSAWS

The XPERT saw range takes wood cutting to whole new levels of comfort and performance. Designed for Professionals - The XPERT saw range has a specific saw for every material and application.

BEVELS AND SQUARES

Bevelled squares are used for marking out lines, testing squares and angle lengths. Sliding bevels are used for marking angle lengths. All measuring tools are made from aluminium block and with a steel blade. The scales are etched on the surface which ensures long durability and are manufactured according to very fine tolerances, so all IRWIN® measuring tools are very precise.

Robust lever cap has three pressure points & brass locking nut for secure location of the cutting iron
Fine adjustment is controlled by a brass adjusting nut and lateral adjusting lever

BEVELS, SQUARES & PLANES

QUICK-GRIP®

In 1986 Joe Sorensen, an air boat builder in Nebraska USA, was looking for a better way to hold down his steel panels as the clamps he was using twisted the thin steel as he worked.

A year later, with a good idea for a new style of clamping, he came to American Tools and soon became an employee and working together, the concept for a pistol grip one-handed bar clamp was born. This revolutionary tool was quickly patented and brought to market in 1989 with a full line of clamps under the Quick-Grip® brand name. The line was later extended from the Original clamp to the Micro, Mini, Handi, Quick-Change, and more recently the XP clamp.

Since the launch, IRWIN® Quick-Grip® has become the world leader in one-handed bar clamps and is the industry standard which has changed the way tradesman do their jobs, greatly improving their ability and efficiency on the job.

Record®

Originally established in 1898 in the South Yorkshire city of Sheffield in the UK. The Record Tools Factory was swiftly able to make a long lasting contribution to the worldwide reputation of the region for the manufacture of high quality steel and castings.

The Record® brand name was introduced in 1909 and by the 1920's the product range had expanded into Vices, Planes, Clamps and Pipe Wrenches enabling the business to grow rapidly in the UK and many overseas markets.

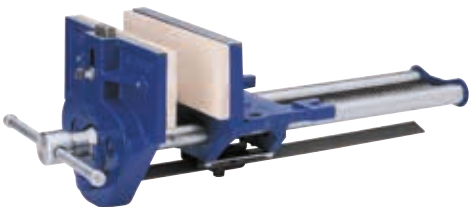

Today, IRWIN® Record® continues excelling by sticking to the traditional values set by its founders, producing tools that are highly valued amongst professional users for quality and durability that remains strong today.

QUICK CLAMPS

HEAVY-DUTY CLAMPING

IRWIN® RECORD® PRO CLAMP

- 1. TPE PADS**
Provide friction to work surface
Reduce marking of work piece.
- 2. 3-COMPONENT HANDLE**
For higher torque transfer than wood,
plus added comfort.
- 3. IMPROVED DESIGN**
New improved Rib location to improve
strength at less weight.
- 4. I-BEAM DESIGN**
Provides higher mechanical strength and
less torsion. Zinc plated for rust
prevention.

T-BAR CLAMPS 136 SERIES AND SPARE PART

These clamps resist twisting and distortion under clamping pressures. Both the head and slide are guaranteed unbreakable. The slide is secured by a solid steel pin passing through one of the locating holes spaced along the steel bar. The steel mainscrew applies pressure quickly and smoothly through a fast acting, hard wearing rolled thread. Slides and heads are flat bottomed so that the clamp will stand without support.

MITRE CUTTING CORNER CLAMPS

Accurate mitre clamping is provided by IRWIN® Record® Corner Clamps. The clamps have two countersunk holes for fixing to a wooden block, which can then be secured between the jaws of a bench vice. Thanks to the precision machined clamping surfaces and open design, these clamps are straight forward to operate and provide easy access for glueing and nailing.

HEAVY-DUTY G-CLAMPS 121 SERIES

IRWIN®'S STRONGEST G-CLAMP

IRWIN® Record® Heavy-Duty G-Clamps are the strongest you can buy. Recommended particularly for metalworking and fabrication work where a very high clamping force is demanded.

Drop-forged steel frame for strength and durability. Recommended for heavy-duty metal and fabrication work

Swivel shoe helps clamping on uneven surfaces
Twin-start Acme cold rolled thread for faster operation

Fused steel handle will bend before the clamp can be overstressed

IRWIN®

Record.

VICES AND ACCESSORIES

IRWIN® Record® Vices have become the benchmark by which all other vices are measured. Design, choice of materials and manufacturing disciplines each set very high standards which, for the end user, translate into safety, reliability and excellent value.

ENGINEERS' VICE - LIFETIME VICE RANGE

Designed for heavy-duty work, these vices are made from S.G. Ductile Iron with an integral anvil for shaping and beating, together with a quick-release mechanism for rapid slide adjustment. The reinforced body and slide, large diameter main screw allow these vices with the working strength and resilience to withstand the most demanding work. Fitters' vices are similar in design to Engineers' however made of close grained gray iron instead of S.G. Ductile Iron. Full line of replacement parts available.

ENGINEERS' AND FITTERS' VICES

1. IRWIN® ENGINEERS' VICES

Are made from S.G. Ductile Iron with high-impact resistance, guaranteeing strength and long life.

2. SAFETY STOP

Prevents the slide from being separated from the body.

3. FULLY MACHINED

On all load-bearing surfaces for smooth and troublefree operation.

4. FUSED STEEL HANDLE

Will bend before the vice can be overstressed.

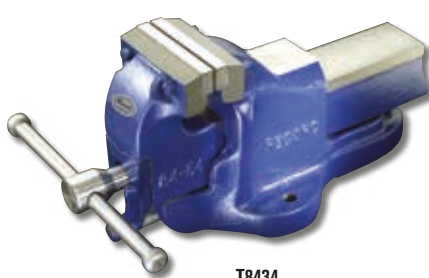

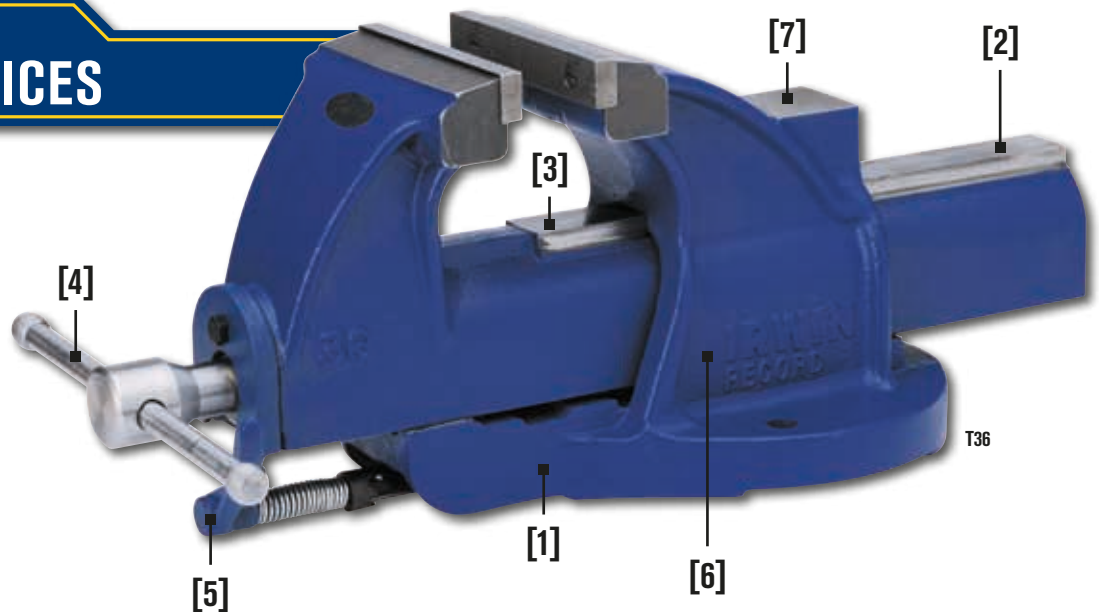

5. QUICK-RELEASE MECHANISM

Disengages the main screw, allowing rapid movement of the slide.

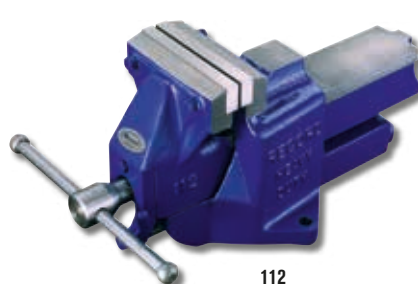

6. UNBREAKABLE SG IRON NUT

Can be replaced when worn.

7. INTEGRAL ANVIL

**S.G. Ductile Iron is strong and flexible with similar characteristics to steel and is virtually unbreakable. Heavy duty vices manufactured from this material are designed to take much more punishing workloads than normal vices.

MECHANICS' VICE - HEAVY DUTY RANGE

Rigid and robust, the body and sliding jaw are cast from close grained grey iron which is machined on all friction surfaces for a smooth reliable action. The jaws, handle and main screw are steel, the latter having a two-start rolled acme thread to speed the jaws from fully closed to fully open with a minimum of winding. The most commonly used vice in the IRWIN® range. Full line of replacement parts available.

- Body and sliding jaw** are cast from close grained grey iron which is machined on all friction surfaces for a smooth reliable action

WORKSHOP VICES - MEDIUM DUTY

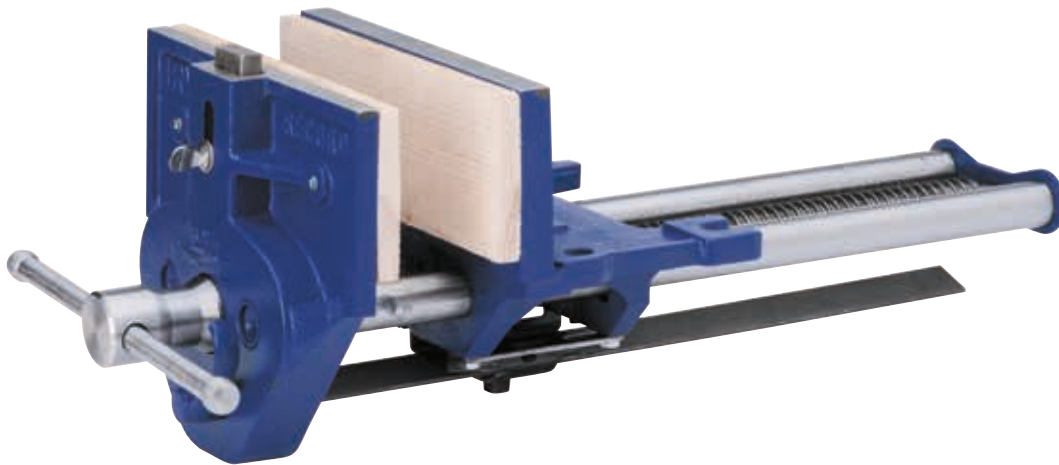

Strong and durable, the body and sliding jaw are cast from close-grained grey iron which is machined on all friction surfaces for a smooth reliable action. The jaws, handle and main screw are steel, the latter having a two-start rolled acme thread to speed the jaws from fully closed to fully open with a minimum of winding. This compact bench vice with anvil is specifically designed for medium-duty workshop applications for both the professional craftsman and the DIY enthusiast who expect a compact vice with superior clamping force, safety features and excellent finish.

QUICK-RELEASE WOODWORKING VICE

Squeeze the trigger and a quick-release vice can be opened and closed without using the mainscrew. Large and small work pieces can be quickly interchanged, while releasing the trigger returns the mechanism to normal for fine adjustment. An ideal addition to the engineering workshop or tool room. For clamping and holding wood work pieces.

Two steel guide rods to reduce wear and ensure a smooth parallel action

Jaws "toe in" so that when pressure is applied they give an even clamping over the whole depth of the work piece

Adjustable dog used in conjunction with bench stops fitted into the bench top

Location holes are provided so you can fit your own choice of wooden cheeks to protect the work piece

Squeeze the trigger and a quick release vice can be opened and closed without using the mainscrew. Large and small work pieces can be quickly interchanged

TABLE VICE

This is an ideal portable vice for the amateur and model maker. The built-in clamp allows it to be easily and quickly attached to a bench, table or work surface. Pipe grips are incorporated below the parallel jaws. A useful anvil is also included on the rear of the body. An ideal portable vice for DIY and model making.

CHAIN PIPE VICES

The chain pipe vice generates a powerful grip due to its sturdy construction. The drop-forged, heat-treated steel jaws and high-tensile steel chain are mounted on a body cast from ductile iron that is guaranteed unbreakable. The flexible chain means the vice is compact and easy to store when not in use.

Knives and Blades

BI-METAL UTILITY BLADES

Bi-Metal is formed by welding high-speed steel edge and spring steel, having the benefit of both types: **Safety & Longer Life.**

The blades are safer since they will not break under normal working conditions, they help reduce the risk of injury from breaking or shattering blades. And with Bi-Metal blades lasting longer than traditional carbon blades, they result in fewer blade changes which means fewer accidental cuts.

BI-METAL BLUE BLADES

1. SHATTERPROOF

The spring steel backing combined with dual hardening of the blade makes our blade more durable, and shatterproof.

2. LAST 3 TIMES LONGER*

More cuts for your money.

3. SPRING STEEL

Allows the blade to bend without accidentally breaking.

4. HIGH-SPEED STEEL

Delivers a hardened cutting edge that stay sharp 3x longer than traditional carbon blades*.

5. FITS MOST KNIVES

The two-notch blade design fits most utility knives.

6. SOFT SNAP TECHNOLOGY

For breaking a new edge confidently.

*vs IRWIN® carbon blades 10504245 / 10504561

Bi-Metal Safety Blade - Not Pointed

UTILITY BLADES

CARBON STEEL 4POINT TRAPEZOID BLADES

This latest IRWIN® innovation combines the toughness of a traditional trapezoid blade with the increased blade tip life of a snap-off blade. Scored edges give the user 4 sharp points (vs. 2 points on a standard trapezoid blade) which doubles the life of the blade. The 4 notches enable the blade to be extended to maintain blade length after snapping off sections of the blade.

Formers supported on both sides so they will not twist under heavy loading

Durable, hardwearing steel rollers last much longer than aluminium

Solid lug allows the machine to be held firmly between vice jaws

Heavy gauge formers won't lose their shape
15 & 22mm Formers have degree marks on the casting for 'at-a glance' accuracy

Flat edges to the bracket arm also allow the GLM to be used in workshop vice for convenient bending

Steel inserts to the bungs eliminate piercing and increase durability To assist the bending of large diameter tube the IRWIN® Hilmor® GLM has

pimpled bungs on the bending levers which prevent the arms slipping if they are used on the floor

PIPE AND TUBE BENDERS

With the IRWIN® Hilmor® range of tube benders, you can be ready to tackle any job with ease. All machines feature precision tooling to give a smooth, accurate bend every time across a large range of sizes.

GLM HAND BENDING MACHINE AND SPARE PART

The IRWIN® Hilmor® GLM hand bender has a maximum capacity of 22mm copper and 15mm stainless steel and can also bend 12, 15 & 18mm copper. The GLM is also available with imperial tooling. The design of the IRWIN® Hilmor® GLM with a straight arm makes it the strongest machine available.

joran®

The origins of Joran® go back to May 1944 at which time, good friends Poul Jensen and Herman Reinholdt formed the company Jensen and Reinholdt in Hvidovre, Denmark. They initially began producing masonry drill bits and later in 1955 expanded the production line to hammer drill bits.

Both product lines were characterised by uncompromising quality and were mainly offered to the building and construction industry. IRWIN® is committed to continue the original values of these products by delivering state of the art of Power Tool Accessories. The masonry drill bits range is no exception to this, and continues to fulfill the highest industry standards.

The Joran SPEEDHAMMER™ Plus and SPEEDHAMMER™ Power have the certification of “Prüfgemeinschaft Mauerbohrer” e.V. (PGM), which is the official and independent marking validating the standards of masonry drill bits. The mark is granted only to manufacturers fulfilling the following:

- state-of-the-art manufacturing under use of a quality assurance system
- yearly inspections of the produced drill bits by independent institutes

The inspection requirements are developed by the national approval bodies for anchors in co-operation with leading manufacturers of masonry drill bits and anchors. The Steering Committee of PGM® also carries out appropriate investigations in order to assure the suitability of masonry drill bits for anchor fixings.

New types of drills bits get the inspection mark only after extensive testing has been carried out, ensuring the required suitability and performance.

SPEEDHAMMER™ POWER

LONGEST LASTING IRWIN® HAMMER DRILL BIT EVER!

The new range of Speedhammer™ POWER drill bits is the most powerful yet. The unique tip design with 2X more carbide* is optimised for fast, continuous drilling, even through reinforced concrete, delivering superior performance and 2X longer life*. The Speedhammer™ POWER bit has a high-performance tip that's manufactured with 2X more carbide*.

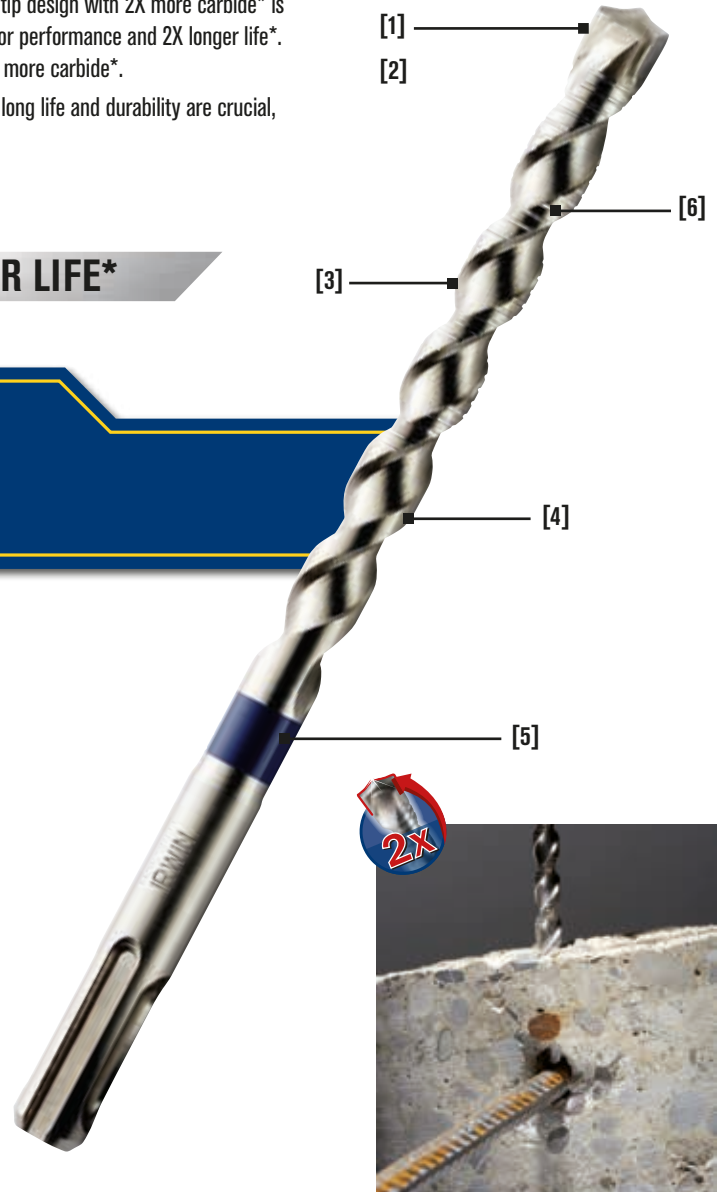

It easily powers through 2X more concrete and rebar than traditional masonry bits. When long life and durability are crucial, depend on the IRWIN® Speedhammer™ POWER Bit.

2X LONGER LIFE*

SPEEDHAMMER™ POWER

1. **2X MORE CARBIDE IN TIP**
For longer drilling life even in rebar-reinforced concrete.
2. **FAST 2-CUTTING CARBIDE TIP**
Optimised for cutting through rebar at high speed.
3. **MAXIMISED FLUTE**
For faster, more efficient dust and debris removal.
4. **PREMIUM STEEL**
Provides improved core strength for maximum durability and extended life.
5. **BLUE POWER RING**
For easier identification in the toolbox.
6. **OPTIMAL GROOVE DESIGN**
Minimises friction for increased speed and longer life.

**SPEED
POWER
HAMMER™**

MASONRY DRILLING

APPLICATION:

Compatible with all hammer drilling machines with SDS-plus holder. Optimised for fast, continuous drilling, even through reinforced concrete, delivering superior performance and 2X longer life*.

DRILLING RECOMMENDATION:

When using drill bits with length over 400mm, pre-drill at least 150mm deep with a shorter drill bit of the same diameter.

* vs traditional masonry bits

SPEEDHAMMER™ Power drill bits have the certification of Prüfungsgemeinschaft Mauerbohrer e.V. (PGM).

BENEFITS OF PGM MARKED DRILL BITS:

- Strict tolerance limits for the diameter and the symmetry of the carbide tip ensuring the exactness of the drill hole.
- Secure anchoring and fixing.
- Constant quality assurance.
- Safety and confidence in the product.

Adherence to these criteria is constantly controlled by PGM, making the tool safe and trustworthy for the end user as well as the distributor.

PTA A

SPEEDHAMMER™ PLUS

FASTEST IRWIN® HAMMER DRILL BIT EVER

Speed. Set the pace with Speedhammer™ Plus. With 28% greater flute capacity, the innovative design goes straight in and straight out. It removes dust and debris really fast. And it's particularly effective in uncured concrete due to clog-free performance.

20% FASTER*

1. INNOVATIVE HEAD AND TIP GEOMETRY

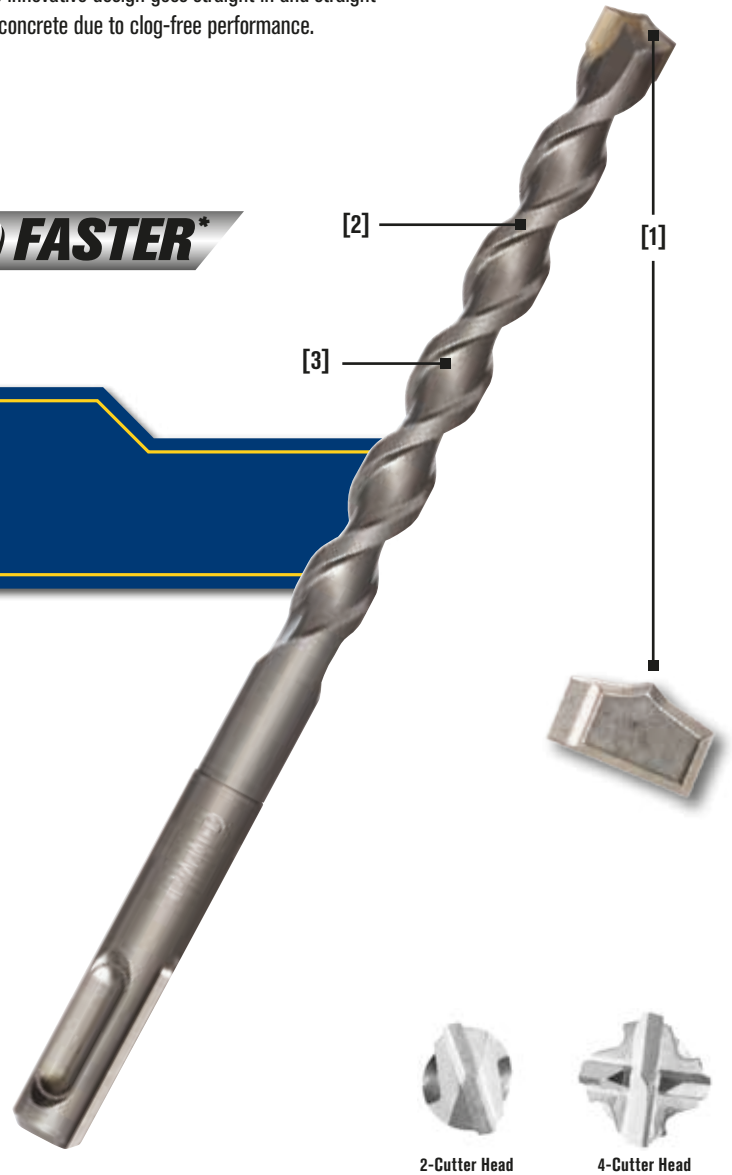

25% thicker carbide tip improves strength and durability. Aggressive concave cutting angles increase drilling speed by up to 20%. Extra short drill bit head clears drilling dust directly into the flute, reducing the risk of clogging. Centering point prevents walking.

2. UNIQUE FLUTE DESIGN

New extra deep, asymmetrical flute design secures a faster dust removal and increases drilling speed.

3. SURFACE TREATMENT

Drill bit fully hardened resulting in maximum rupture strength.

MASONRY DRILLING

APPLICATION:

Compatible with all hammer drilling machines with SDS-plus holder. Designed for drilling in concrete, masonry, brick, block, and granite.

DRILLING RECOMMENDATION:

When using drill bits with length over 400mm, pre-drill at least 150mm deep with a shorter drill bit of the same diameter.

* Up to 20% faster drilling vs. competitor products due to tip geometry and innovative flute design.

SPEEDHAMMER™ Plus drill bits have the certification of Prüfgemeinschaft Mauerbohrer e.V. (PGM).

BENEFITS OF PGM MARKED DRILL BITS:

- Strict tolerance limits for the diameter and the symmetry of the carbide tip ensuring the exactness of the drill hole.
- Secure anchoring and fixing.
- Constant quality assurance.
- Safety and confidence in the product.

Adherence to these criteria is constantly controlled by PGM, making the tool safe and trustworthy for the end user as well as the distributor.

IRWIN® tip design enhances dust removal and provides symmetrical holes
Head takes 80% of the workload, ensuring higher durability, speed and rebar performance
53° drilling head design means more aggressive cutting and faster dust removal for overall faster performance
Four-cutter tips for less vibration, faster drilling, rounder holes and better anchoring
Single Flute design for faster dust removal and increased drilling speed
Shank fits in all SDS Max Hammer Machines

MASONRY DRILLING

For a wide range of applications for both SDS Plus and SDS Max hammer drills: breaking through, breaking up concrete, light demolition work and chasing of channels for pipes and electrical conduit

Application: concrete and masonry
Grey sandblasted professional finish

DEMOLITION CHISELS

POINTED CHISEL

For general chiselling and breaking work in brick, concrete and loose stone (eg: when laying cables)

FLAT CHISEL

For general chiselling and breaking work in brick, concrete and loose stone (eg: when laying cables)

SPADE CHISEL

For removing large quantities of material

GOUGE CHISEL

For cutting narrow channels into concrete

TCT POINTING CHISEL

For the removal of pointing in brickwork

CRANKED TILE CHISEL

For easy removal of tiles

Pilot drill: The pilot drill is securely fixed by a set screw which can be tightened with a hex key
Core removal: After drilling, the core often gets stuck in the core drill. To make the removal easier, the lightweight core drills have a hole

CORDLESS MULTI

ONE DRILL BIT FOR EVERY NEED!

The Cordless Multi drill bit is IRWIN®'s most versatile drill bit. It is designed to drill in multiple materials including brick, light concrete, dry wall, ceramic tiles, sheet metal, wood, plastic and marble. In addition to the multipurpose function, the Cordless Multi is IRWIN®'s problem solver for drilling into ceramic tiles up to a hardness grade of 9.

CORDLESS MULTI

1. HARDEST CARBIDE GRADE

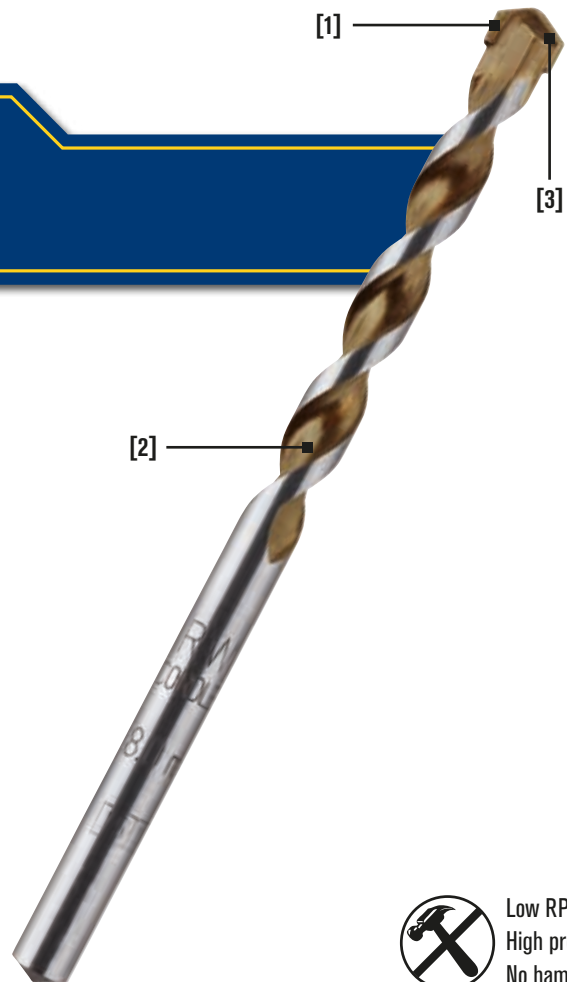

And unique point grinding for fast drilling into most common materials and hardest tiles (scratch hardness 9).

2. SINGLE FLUTE DESIGN

Giving maximum space for dust removal. Up to 15% Speed advantage over competition. 10% more holes per battery charge.

3. UNIQUE TIP GRINDING

Brazed carbide tip has a unique diamond ground 4-face design for excellent centering and perfect hole quality.

Low RPM.
High pressure.
No hammer action.

Improved carbide tip design ensures for durable and fast drilling in all masonry materials

Aggressive head design up to 15% Speed advantage over competition

Now 20% more life vs. previous version

Single flute design giving maximum space for dust removal and provides a 60% faster dust removal

MASONRY DRILLING

GRANITE

For percussion drilling in very hard materials such as granite

Extremely hard and wear resistant carbide tip guarantees up to 40% more holes compared to conventional masonry drill bits

Stone masons favour this product for impact drilling of natural stone like granite

Special shaped cutting edges mean higher durability resulting in 50% more accurately sized holes per drill bit.

GRANITE

DESIGNED FOR PERCUSSION DRILLING IN VERY HARD MATERIALS

GRANITE DRILL BITS - ROTARY PERCUSSION

10507899	Diamond Drill BIT 15mm	5706915078992	60	1	32.45	38.94	

USEFUL TIPS:

1. Drilling with water increases the lifespan of the tool.
2. Do not press strongly on the tool, let it work.
3. Make a swinging movement to allow dust evacuation.
4. Cutting speed: 2700 RPM.
5. No hammer action.

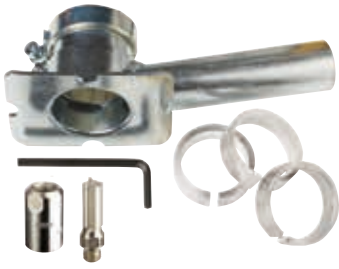

The drill needs to run before hitting the surface. To avoid sliding of the drill, start with an angle of 45°

Once the hole has started, raise the drill gradually up to the vertical line

Make an oscillating movement while drilling

MORTAR RAKES

The Mortar Rake is designed to replace traditional methods of mortar removal such as powered mortar chisels and cutting discs. The rake is faster and less intrusive to surrounding brickwork and, unlike other methods, it is just as efficient for both horizontal and vertical joint clearing.

Please note that the cutters must be used together with an adaptor (10507234) and angle grinder.

M-SYSTEM

M-SYSTEM

2 in 1 tool designed for easy and fast fixing of roofing materials

The M-System is a two-in-one tool for drilling and fixing of fibre cement and similar roofing/panelling materials

Improved carbide tip ensures easy start

After drilling the hole pull back the pilot drill and fix a hexagon screw with the same tool

ENGINEERED FOR CONTROLLED PRECISION AND SPEED

The IRWIN® line of metal drill bits offers of solution for every professional application. Each metal drill bit is made of high speed steel with high precision-cut point and spiral, ensuring durability and quality.

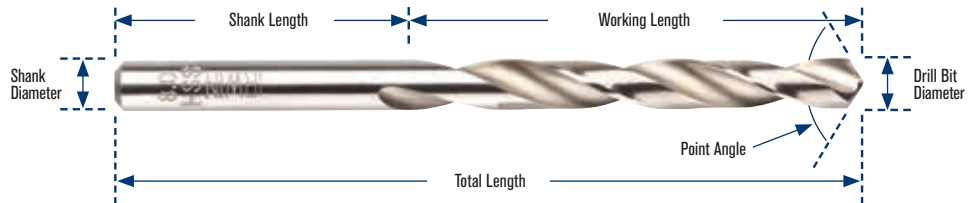

Total Length: The length from the point to the end of the drill bit

Point Angle: The angle of the cutting edges

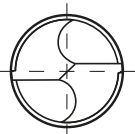

Drill Diameter: The cutting diameter of the drill bit

Shank Length: The end of the drill bit that is secured by the drill

Working Length: The length from the point to the end of the flutes

TIP GEOMETRY

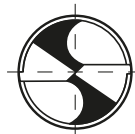

118°

118° STANDARD POINT

- For drilling in alloyed and non-alloyed steels, non-ferrous metals, cast iron and hard plastics
- Can be easily resharpened
- Requires higher feed pressure
- Best for stationary drills

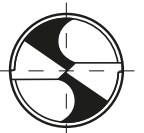

118°

118° SPLIT POINT

- For drilling in alloyed and non-alloyed steels, non-ferrous metals, cast iron and hard plastics
- Very good centering
- Requires less effort / feed pressure

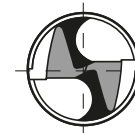

135°

135° SPLIT POINT

- For drilling in high strength steel and high-alloy steels
- Very good centering
- Requires less effort / feed pressure

TURBOMAX® JET POINT

- Specially designed for portable drills
- Excellent centering, will not walk on any surface
- Precision-ground to stay sharp longer and drill faster

HSS DRILL BITS

HSS TURBOMAX

HSS COBALT

HSS PRO

SPECIALITY DRILL BITS

STEP DRILLS

TCT

TURBOMAX™ HSS

DESIGNED FOR HIGH PERFORMANCE DRILLING

Turbomax™ is designed primarily for high performance drilling in sheet metal, however, also performs well in all types of wood and plastic. Suitable for drilling stainless steel however, HSS Cobalt products (p.105) are designed specifically for this purpose. Remember to always use a coolant when drilling stainless steel.

TURBOMAX™

1. 100° TIP FOR FASTEST START

Most precise centering and guidance.
No walking, also on curved surfaces.
No centre punch necessary.

2. 140° CUTTING SHOULDER FOR SMOOTH FINISH

Perfectly round holes.
Clean exit holes – minimised burrs.
Will not bind in multiple layers of thin material.

3. GROUND FLUTE

Ground from solid.

4. REINFORCED WEB

For added strength and durability
Robust design –no breakage.

5. W9 HSS (HIGH SPEED STEEL)

Superb heat resistance.
Sharp cutting lips.

6. HARDENING

Superb wear resistance.
Hardness of 63-66 HRC.

7. 3-FLATTED SHANK

Prevents slipping in chuck.
No damaging of the drill due to slipping.
Safe and strong clamping, especially when using keyless chucks.
Best power supply to the cutting lips – spend the power where it's needed.

JET POINT – REVOLUTIONARY TIP DESIGN
Self centering, will not walk on any surfaces

135° SPLIT POINT GRINDING ensures perfect centering and reduced drilling pressure
GROUND FLUTE Industrial quality ground flute for high accuracy drilling and fast removal of chips
COBALT ALLOYED Drill bit body manufactured from high quality HSS steel containing 5% Cobalt (Co). The added 5% Cobalt improves the red hardness (heat resistance) of the drill bit and results in significantly extended life
SURFACE FINISH Golden tempered surface

135° SPLIT POINT GRINDING ensures perfect centering and reduced drilling pressure

GROUND FLUTE Industrial quality ground flute for high accuracy drilling and fast removal of chips

TITANIUM NITRIDE COATED Drill bit body manufactured from high quality HSS steel coated with Titanium Nitride (TiN).

The TiN coating has a hardness of app. 80 HRC and is very resistant to wear.

TiN has a low coefficient of friction. This results in less power being consumed and less heat generated during the drilling.

SPEED AND FEED Compared to traditional HSS Twist Drill Bits speed can be increased by 40 -60% and feed by 10 -20% without reducing the life time of the drill bit significantly

LESS HEAT TiN is also a poor conductor of heat, so the heat generated during the drilling process is diverted into the chips and coolant and less into the drill bit

ALSO AVAILABLE IN SETS

HSS PRO

TOUGHNESS AND PRECISION FOR PROFESSIONAL USERS

The new HSS PRO is an Industrial quality twist drill with outstanding performance and long service life. It is designed for drilling steel and steel castings, alloyed and non-alloyed steel, cast iron, non-ferrous metals, plastics and other materials.

The 118° split point shape provides an optimum centering when starting and a faster drilling rate. It requires lower feed pressure than standard HSS drill bits with a chisel edge.

HSS PRO

1. 118° SPLIT POINT SHAPE

- With increased performance and very good centering
- Precision starting, no need to pre-punch or pilot drill.
- Penetrates quickly.
- Requires less effort / feed pressure.

2. GREATEST TOUGHNESS

And low risk of breakage even when drilling with smaller diameters due to high elasticity.

3. OPTIMUM DRILLING PERFORMANCE

Even in unfavourable working conditions.

4. HIGHLY ACCURATE

Close tolerances and high concentricity for maximum precision.

5. HIGHEST STEEL GRADE

High-performance, High-Speed Steel.

40% MORE HOLES*
*vs previous version

HSS PRO DRILL RANGE

The HSS PRO drill bits are available in a wide range of variety: DIN 338 jobber series, DIN 340 long series, double-ended stub series, DIN 345 Morse taper shank series.

DIN 338		DIN 338 series, suitable for many trade and industrial applications in alloyed and un-alloyed steel, non-ferrous metals, cast iron and plastics.
DIN 340		DIN 340 long series, most suitable for drilling deep holes or through hollow profiles.
DOUBLE-ENDED		Double ended series, especially designed for drilling thin materials like sheet metal, flat steel and profiles. Ideal for use with hand-held drills.
DIN 345		DIN 345 Morse taper shank series, strong standard drills for use with stationary drilling machines. High breaking resistance.

HSS PRO

DESIGNED FOR DRILLING A WIDE SELECTION OF MATERIALS

118° CHISEL POINT SHAPE for maximum service life
 MORSE TAPER SHANK to Din 345 standard
FOR STATIONARY DRILLING
 SURFACE FINISH: Black oxide coating
 PACKAGED in Quadro Pack

IRWIN.

Unibit™

STEP DRILLS

DESIGNED FOR PRECISE DRILLING IN THIN MATERIALS

UNIBIT® STEP DRILLS

1. SELF CENTERING POINT

Will not walk, eliminates centre punching.

2. DRILL BIT BODY

Made from Chrome Vanadium Steel.
Hardened to 56 HRC.

3. FLUTE

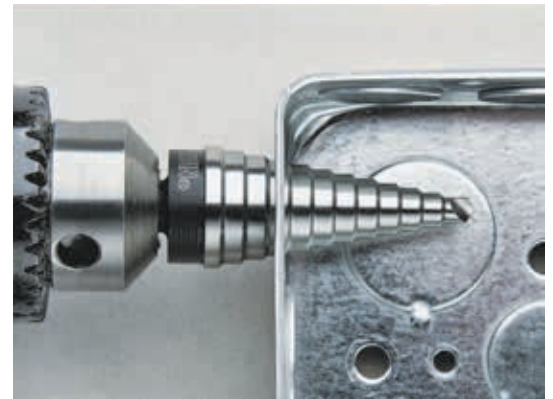

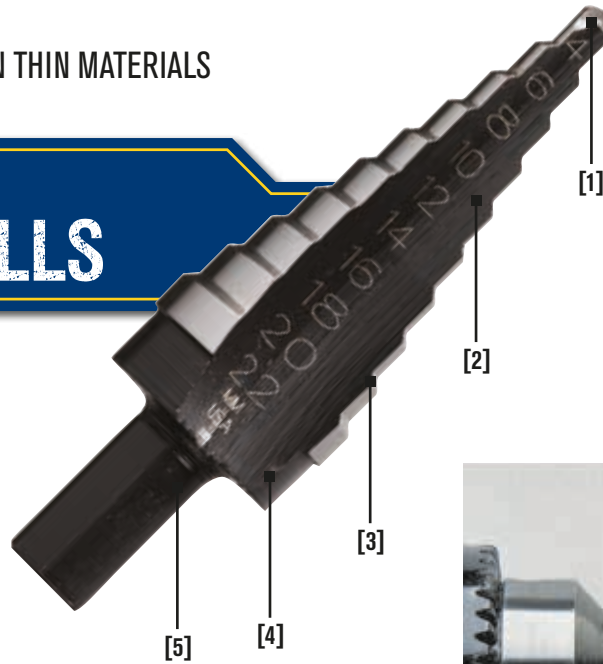

Extra deep ground double flutes
for extra chip capacity.

4. IDEAL FOR DRILLING HOLES IN THIN MATERIALS

Such as mild steel, copper, brass, aluminium, plexiglass,
plastic, wood and laminates.

5. FLATTED SHANK

Prevents the drill bit from slipping in the chuck.

TCT

DESIGNED FOR DRILLING HARD AND ABRASIVE MATERIALS

CARBIDE TIP will drill hardened material up to a hardness of 50 HRC.

Four faceted ground for low drilling pressure and perfect centring

FLUTE Extra deep ground double flutes for extra chip capacity

BODY CLEARANCE Reduced flute land means less friction

DRILL BIT BODY made from Chrome Vanadium Steel. Hardened to 56 HRC

COOLANT should always be used when drilling with TCT Twist Drill Bits.

It is recommended to use a 3-6% emulsion. The coolant will extend the life time of the drill bit

TCT DRILL BITS

PTA B

IRWIN®

In 1885, Charles Irwin patented the Auger bit and, along with four business partners, formed the IRWIN® Auger Bit Company in Ohio, USA. Over 125 years later, IRWIN® is still the leading manufacturer of wood drilling bits and accessories. No matter what wood drilling project you face, IRWIN® Tools makes a drill bit that performs the job better. Our mark of quality is stamped right on the shank of our full range of bits. Whether the job requires quick, clean holes, or precise finish work, IRWIN® has a bit for every application and every need.

IRWIN® Blue Groove 4X and Blue Groove 6X wood boring bits raise-the-bar on tool quality and performance. Its cutting edge technology incorporates true "cutting edges" that glide through the wood versus scraping its way through. Professionals can now improve their productivity and accuracy with IRWIN®'s innovatives ranges. The latest generation Blue Groove Power is adding extreme durability thanks to Bi-Metal Technology.

QUICK-CHANGE EXTENSIONS

STANDARD EXTENSIONS

BLUE GROOVE POWER WOOD BORING BITS THE LONGEST LASTING FLAT BIT EVER!

BLUE GROOVE POWER

1. EXTREME DURABILITY

Bi-metal cutting edges provide long life in tough applications.

2. FULL SCREW TIP

For ease of use and pull through.

3. TAPERED FLUTE

For less binding and ease of use.
'Tri-Flute' Design For faster chip ejection.

4. COMPACT LENGTH

Designed to fit between studs in most common applications.
1/4" Quick-Change Shank on Blue Groove Power 14-16mm. 3/8" Quick-Change Shank on Blue Groove Power 18-32mm.

WOOD DRILLING

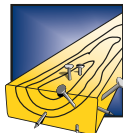

* Up to 6 times faster than competitor products

* Up to 50 times more durable than competitor products.

COARSE SCREW POINT for faster drilling into all types of wood

SINGLE SPUR DESIGN for smoother hole finish

EXTRA WIDE FLUTE for faster chip removal
FULLY HARDENED BODY from tip to shank for extra durability

HEX SHANK prevents bit slipping in chuck

Perfect for all types of wood
Creates perfect and straight holes

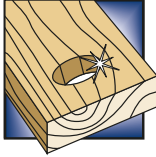

WOOD DRILLING

BRAD POINT

Perfect for all types of wood
Creates perfect and straight holes

Brad point tip provides accurate positioning for starting the hole

Bit is precision ground for use in furniture making, doweling, cabinetry and other woodworking applications where an exact hole size is required

Spur cutting edges reduce splintering and ensure a smooth, clean hole

Wide flutes provide a fast, continuous flow of chips

BRAD POINT PRECISE DRILLING OF CLEAN HOLES

IRWIN® IMPACT DOUBLE-ENDED BITS

- 1. DoubleLok Technology™**
Ensures both ends of bit lock securely in impact drivers and quick-change chucks, enabling use of two tips from one bit for added convenience and extended life
- 2. Precision tip geometry**
Delivers superior fitment, reducing stripping and cam-out
- 3. Power Groove**
Designed for compatibility with IRWIN® Impact Performance Series™ Magnetic Screw-Hold Attachment
- 4. Manufactured with heavy-duty, high-grade steel**
To withstand high torque output

Marples®

At the heart of quality craftsmanship lies the rich heritage of Marples® woodworking tools. Originating in 1828 in Sheffield, England, the Marples® brand has consistently stood for superior performance and ultimate precision in fine woodworking.

Marples® is traditionally famous for chisels and synonymous with high-quality woodworking tools. The new range of Circular Saw Blades made in Udine, Italy uses best-in-class manufacturing capabilities and processes giving a range fitting of the Marples® brand.

The WeldTec platform combines various attributes to deliver long lasting performance.

WeldTec on Circular Saw Blades is the welding of teeth to the blade as opposed to the traditional brazing teeth. This is ideal for handheld corded and cordless blades as the weld provides a strong bond in case of unexpected nail strikes or foreign objects embedded in wood.

HAND-HELD

CORDLESS

CORDED

MITRE

TABLE

IRWIN® MARPLES®

1. LIFE, DURABILITY, SHARPNESS

Carbide is larger and tougher than standard carbide for 3x longer life resharpenable

[1]

2. ACCURACY, CLEAN CUT

Laser cut blade body for straighter, cleaner cuts

3. ACCURACY, CLEAN CUT

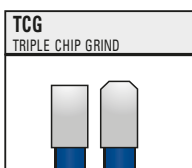

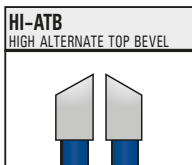

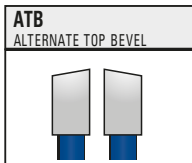

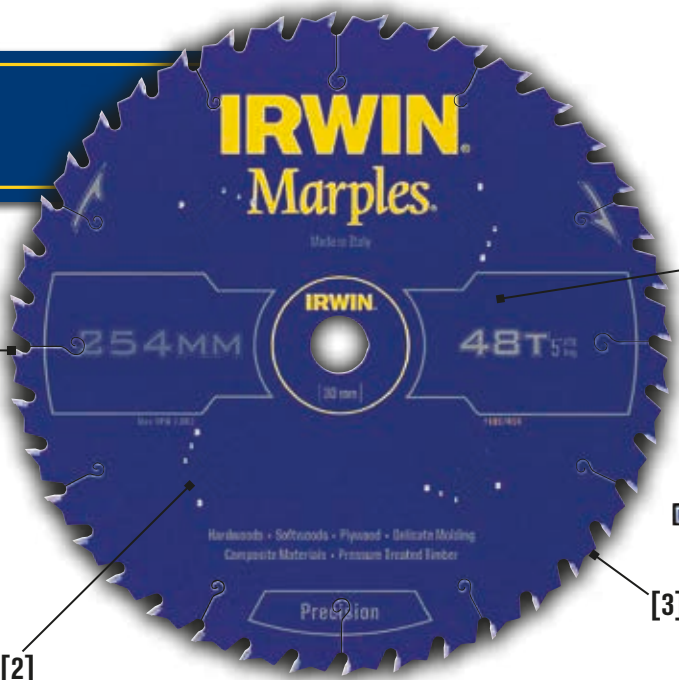

Precision Tensioning for Greater Accuracy

4. SMOOTH FEEL, NO BINDING, COATING

Special coating with aluminum flakes helps to dissipate heat for smooth, cool cuts

WeldTec for Hand Held Coded & Cordless

WITH **WELDTEC™**

IRWIN® WELDTEC

- 1. WELDED CARBIDE TEETH**
30% Stronger tooth bond and for 50% longer life
- 2. ULTRA-COMPACT CARBIDE**
70% Tougher than standard carbide for superior sharpness and cut quality
- 3. INNOVATIVE HEAT VENTS**
- 4. FULLY HARDENED PLATE**
Runs truer longer with more accuracy (Life and Durability)
- 5. ALTERNATE TOP BEVEL**
Tooth grind (ATB) for cross cutting and ripping in all woods

LONG ESTABLISHED MANUFACTURING EXCELLENCE LEADS TO PERFECTION

IRWIN® manufactures and distributes high quality cutting tools for trade professionals who demand superior performance and durability on the job.

Our engineers have been working for almost a century on constant product improvement, resulting in a state-of-the-art in-house electron beam welding process to create the highest quality bi-metal blades that out-perform the competition, stay sharper and last longer.

The WeldTec™ platform combines various attributes to deliver long lasting cutting performance. A revolutionary tooth geometry and an updated tooth set enables faster and smoother cuts, as well as improved longevity

HOLE SAWS

RECIPROCATING BLADES

JIGSAW BLADES

BI-METAL HOLE SAWS

IRWIN® Bi-Metal Hole Saws cut through a variety of materials, including: Aluminium, Copper, Iron, Stainless Steel, Wood and Zinc. Electron Beam welded HSS cutting edge for stronger, longer lasting teeth. Precision Set Teeth for faster penetration and cutting. Bi-Metal Construction for toughness and long life.

WITH **WELDTEC™**

BI-METAL HOLE SAWS

1. WELDTEC™ TECHNOLOGY

Delivers enhanced durability and higher cutting speed.

2. 4,5 / 5,5 VARIABLE TPI

Faster cuts, less torque build-up and enhanced chip removal.

3. VARIABLE GULLET DEPTHS

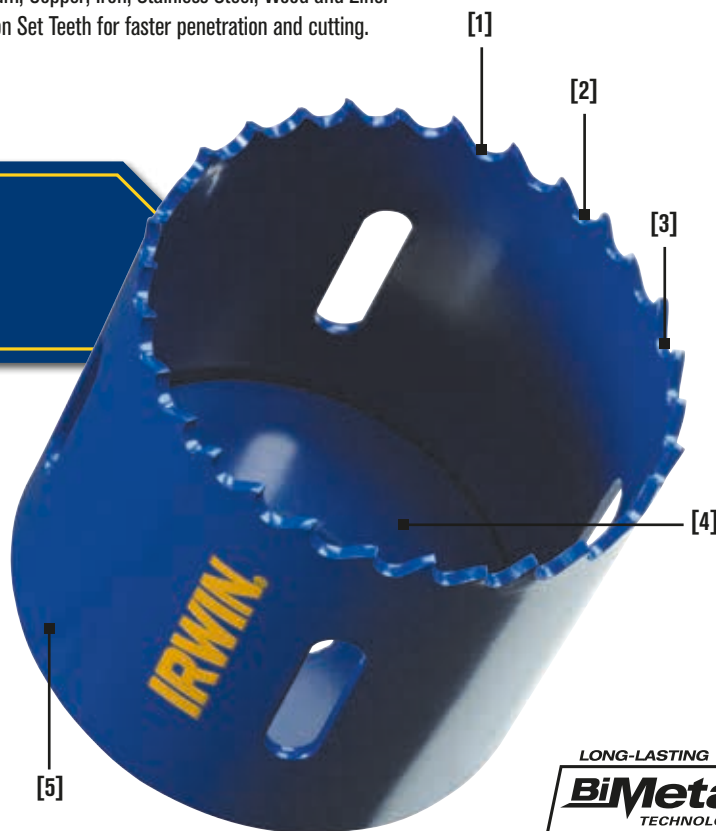

For more efficient chip clearance.

4. THICK BACKING PLATE

Gives robustness for the toughest jobs.

4. BI-METAL CONSTRUCTION

For long life and shock resistance.

NEW TOOTH DESIGN

Up to 100% longer life*

Up to 50% faster cutting*

*vs. previous model

RECIPROCATING SAW BLADES

This comprehensive reciprocating saw blade offering has a blade for every application. IRWIN® blades offer superior construction & design making them faster cutting and longer lasting, therefore giving the user a superior cost-per-cut value.

BI-METAL RECIPROCATING BLADES

1. **INCREASED TANG ANGLE**
For up to 50% faster cuts vs prior model.
2. **BI-METAL CONSTRUCTION**
For a faster cutting, longer lasting blade that can bend without breaking.
3. **8% COBALT**
Keeps teeth sharper, longer.
4. **ELECTRON BEAM WELD**
For stronger, longer lasting teeth.

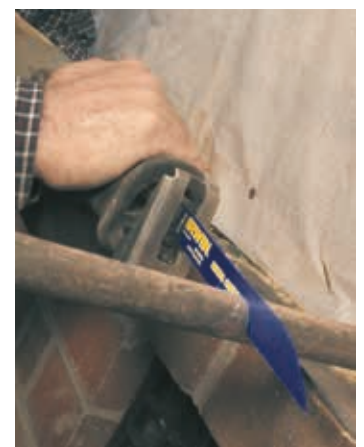

Improved tooth configuration
Faster Cut: Up to 50% faster vs. prior model
Available in: 10, 14, 18 and 24TPI on metal cutting reciprocating saws
Cuts all metals including non ferrous, pipe conduit, stainless & sheet metal
Suitable for use with materials 1.5 to 10mm (1/16" to 3/8") thick, dependent on the TPI of the blade

Universal 1/2" shank

JIGSAW BLADES

This comprehensive jigsaw blade offering has a blade for every application. The range includes both T-shank and U-shank to fit all of today's most popular jigsaw power tool machines.

IRWIN® Jigsaw Blades are manufactured from the following high quality materials:

HCS Carbon steel for use in softer materials such as wood, laminated chipboard, and plastics.

HSS Fully hardened high-speed steel for use in metal, aluminium, and non-ferrous metal.

WOOD CUTTING HCS JIGSAW BLADES - T-SHANK

3 Sided, fleam ground teeth for fast cut and clean finishes

Fast and smooth cut in all wood applications

1 All goods are sold subject to these Conditions which shall prevail over any conflicting conditions sought to be imposed by a customer. These Conditions should be read in conjunction with the Terms as stated below.

Contract

2 Publication of our price list constitutes an offer, and the placing of an order is deemed to be an acceptance of that offer. The resulting contract is subject to these Conditions of Sale.

Property

3 Property in goods shall not pass to buyer until such time as all monies due in any manner or way from Buyer to IRWIN Industrial Tool Company Ltd. have been paid or until Buyer re-sells goods to a third party in the normal course of business. So long as property in goods remains in IRWIN Industrial Tool Company Ltd. and Buyer is in default of any obligation hereunder, IRWIN Industrial Tool Company Ltd. shall have the right without notice to Buyer to retake possession of goods (and for that purpose to go upon any premises occupied by Buyer at any time) and on such retaking the contract on which this condition forms part, shall be terminated. Until property in goods passes to Buyer, Buyer shall keep IRWIN Industrial Tool Company Ltd. informed of the location of goods and shall keep goods in good and marketable condition.

Risk

4 Risk shall not pass at the same time as Property in the goods but shall pass at the time of delivery in accordance with our terms.

Specification

5 We reserve the right to alter without prior notice the specification of any goods listed in the catalogue or price list.

Specials

6 Where any goods are made by us to a customer's design the customer must indemnify us against all claims and liability for breach of any patent, copyright or registered design.

Part Deliveries

7 We reserve the right to make part deliveries against any order and to invoice all such at the time of despatch. Such invoices will be payable notwithstanding that the balance of the order has still to be delivered.

Delivery

8 Delivery of all orders will be made as early as practicable, or as close as practicable to customer's specific requirements. Notwithstanding any delay, however, orders will remain valid and binding.

Cancellation

9 Cancellation of any order or part of an order will be accepted only with our prior consent.

Return of Goods

10 Goods may only be returned with our written consent. On such return they will be credited at the invoice price less a handling charge. Consent will not be given to return goods made specially to order.

Guarantee

11 Our products are guaranteed against defects in material or workmanship subject to fair and proper usage. Any article claimed to be defective will be repaired or replaced free of charge if when returned to us carriage paid, examination confirms such defect, we reserve the right to repair tools, or replace defective parts only, rather than replace the complete article. Customers are not authorised to make replacement of our products without prior approval by us.

Liability

12 Subject to the foregoing guarantee, all warranties express or implied, conditions, undertakings or representations, however imposed, are hereby expressly excluded. We will not be responsible for consequential loss, damages or any other liability, howsoever arising.

Legal Construction

13 These Terms and Conditions shall be construed according to the Law of England, and all sales subject to them shall be deemed to have been made in England.

Box Quantities

14 Products are sold only in unit pack quantities as shown in the Price List.

15 All pricing queries must be notified within 10 days of receipt.

TERMS

Prices

1 Prices shown in our Price List are subject to change without notice.

VAT

2 The RRP prices shown include VAT at the current rate. However, VAT will be charged at the rate ruling at the time of invoice.

Delivery

3 Delivery takes place at customer's warehouse; carriage is paid by us on all orders routed at our discretion.

Order

4 Orders are accepted on the basis of prices ruling at time of despatch. Customers are asked to ensure that their orders are for a minimum value of £120 net.

Payment

5 Payment is due to us by the last working day of the month following despatch.

Shortages

6 Shortage or damage must be reported to us within 48 hours of receipt of consignment by customer.

Non-delivery

7 Non-delivery of a consignment must be notified by customer to us within 21 days from date of despatch to enable us to make a claim upon carriers. Notification outside this period invalidates the claim and no responsibility will be accepted by us.

8 The prior written consent of the Customer will however not be required in case of an assignment to a directly held subsidiary part of the Newell Rubbermaid group.

Errors & omissions excepted – to the best of our knowledge the information supplied in this catalogue or price list is accurate.
